(Journal of Molecular Structure, Vol. 167)

SUBJECT INDEX

Well-tempered Gaussian basis set expansions of Roothaan–Hartree–Fock atomic wavefunctions for lithium through mercury
(Appeared in Theochem Vol. 167 Nos. 1/2 pages 1–210)

Ab-initio analytical gradient studies,
electronic aspects of the hydride transfer mechanism. Part 2. Ab-initio analytical gradient studies of the pyridinium cation/1,4-dihydropyridine, cyclopropenyl-cation/cyclopropene and formaldehyde/methanolate model reactant systems 395

$(BEDT\text{-}TTF)_2I_3$,
quantum chemical study of molecular components of the organic superconductor $(BEDT\text{-}TTF)_2I_3$ 269

1,5-Benzodiazepines,
theoretical conformational analysis of 1,5-benzodiazepines and benzothiazepines 253

Benzothiazepines,
theoretical conformational analysis of 1,5-benzodiazepines and benzothiazepines 253

Bond order,
bond order rearrangements during chemical reactions 331

$(CF_3)_2CX_2$,
calculation of vibrational frequencies of $(CF_3)_2CX_2$ (X=H,D,F,Cl) 227

Complex anions of carbon and silicon,
on the stabilities of the complex anions of carbon and silicon XH_4^- and XH_5^- 235

Conformational analysis,
theoretical conformational analysis of 1,5-benzodiazepines and benzothiazepines 253

Conformational study,
conformational study of cyclic polysulphides Part I. Pentathiepins 245

Cyclic polysulphides,
conformational study of cyclic polysulphides Part 1. Pentathiepins 245

Cyclopropenyl-cation/cyclopropene,
electronic aspects of the hydride transfer mechanism. Part 2. Ab-initio analytical gradient studies of the pyridinium cation/1,4-dihydropyridine, cyclopropenyl-cation/cyclopropene and formaldehyde/methanolate model reactant systems 395

Diabatic surface method,
the diabatic surface method: A model for chemical reactivity 211

Far ultraviolet spectra,
photoelectron and far ultraviolet spectra of lanthanide heptafluoro-dimethyloctanedione complexes 413

Fecapentaenes,
an ab initio study of model compounds of fecapentaenes 359

Formaldehyde/methanolate,
electronic aspects of the hydride transfer mechanism. Part 2. Ab-initio analytical gradient studies of the pyridinium cation/1,4-dihydropyridine, cyclopropenyl-cation/cyclopropene and formaldehyde/methanolate model reactant systems 395

Gaussian basis set expansions,
well-tempered Gaussian basis set expansions of Roothaan–Hartree–Fock atomic wavefunctions for lithium through mercury 1

HCN,
a theoretical study of proton transfer to excited state HCN 307

Homotropylium cation,
substituent effect on the planarization en-

ergy and the relative stability of Winstein and Möbius structures of the homotropylium cation 275
Hydride transfer mechanism,
electronic aspects of the hydride transfer mechanism. Part 2. Ab-initio analytical gradient studies of the pyridinium cation/1,4-dihydropyridine, cyclopropenyl-cation/cyclopropene and formaldehyde/methanolate model reactant systems 395
Hydrogen-bonded chains,
solitonic proton transport in model hydrogen-bonded chains 339

Ketene dimerization reactions,
theoretical studies on the reaction mechanism of ketene dimerization reactions 349

Lanthanide heptafluoro-dimethyloctanedione complexes,
photoelectron and far ultraviolet spectra of lanthanide heptafluoro-dimethyloctanedione complexes 413

MNDOC-CI calculations,
semiempirical MNDOC-CI calculations on photochemical reactions: criteria for selecting configurations 301
Möbius structures,
substituent effect on the planarization energy and the relative stability of Winstein and Möbius structures of the homotropylium cation 275

Organic superconductor,
quantum chemical study of molecular components of the organic superconductor $(BEDT\text{-}TTF)_2I_3$ 269

Pentathiepins,
conformational study of cyclic polysulphides Part I. Pentathiepins 245
Photochemical reactions,
semiempirical MNDOC-CI calculations on photochemical reactions: criteria for selecting configurations 301
Photoelectron spectra,
photoelectron and far ultraviolet spectra of lanthanide heptafluoro-dimethyloctanedione complexes 413
Planarization energy,
substituent effect on the planarization energy and the relative stability of Winstein and Möbius structures of the homotropylium cation 275
Potential energy curves,
pseudopotential calculation with correlated wave functions. Potential energy curves for some small molecules 217
Proton transfer,
a theoretical study of proton transfer to excited state HCN 307
Pseudopotential calculation,
pseudopotential calculation with correlated wave functions. Potential energy curves for some small molecules 217
Pyridinium cation/1,4-dihydropyridine,
electronic aspects of the hydride transfer mechanism. Part 2. Ab-initio analytical gradient studies of the pyridinium cation/1,4-dihydropyridine, cyclopropenyl-cation/cyclopropene and formaldehyde/methanolate model reactant systems 395

Reaction mechanism,
theoretical studies on the reaction mechanism of ketene dimerization reactions 349
Retinal analogs,
a preliminary ab initio investigation of retinal analogs 321
Roothaan–Hartree–Fock atomic wavefunctions,
well-tempered Gaussian basis set expansions of Roothaan–Hartree–Fock atomic wavefunctions for lithium through mercury 1

Solitonic proton transport,
solitonic proton transport in model hydrogen-bonded chains 339
Stabilities,
on the stabilities of the complex anions of carbon and silicon XH_4^- and XH_5^- 235
Substituent effect,
substituent effect on the planarization energy and the relative stability of Winstein and Möbius structures of the homotropylium cation 275

Vibrational frequencies,
calculation of vibrational frequencies of $(CF_3)_2CX_2$ (X=H,D,F,Cl) 227

Winstein structures,
substituent effect on the planarization energy and the relative stability of Winstein and Möbius structures of the homotropylium cation 275
